## Projects

---

- **Smappio: Smart Electronic Wireless Sthethoscope**

*Wireless electronic sthetoscope developed by using Adafruit Feather Huzzah ESP32 module along with Adafruit I2S SPH0645 to capture body sounds (heart and lungs mainly). This project was presented in the congress CoNaII SI 2018 in Mar Del Plata. (Source Code: [github.com/maurobilotti/smappio](https://github.com/maurobilotti/smappio))*

- **Sponsor.Online**

*SPONSOR.ONLINE is an early-stage digital marketplace that connects professional sports teams with suitable brands. The platform is growing fast and leading the digital way of sponsorship negotiation. I have worked in Product Development and Maintainance of the platform during the last 7 months on my free time. Tech stack: Laravel 7, Nuxt.js, MySQL, Go Lang, Google Cloud*

- **Stack Overflow member**

*Helping developers around the world with questions and answers.
